

4 common problems with scaling ML

Why data science teams need MLOps?

- Mundane steps with lots of

# Getting started

boilerplate

**Iteration speed**

- Slow, redundant iterative

development

- Long time-to-market

- Different skills and background

# Collaboration

- Team growth

- Difficulty to reproduce and

manual and bottlenecked

# Productionization

- Handoff to production is

control experiments

- Need to reduce operating costs

: OpenSourceML&GenAI platform

mlflow

## MLflow Recipes

Predefined templates to quickly develop high-quality models and deploy them to production

## MLflow Tracking

Record and query experiments:  
code, data, config,  
and results.

## MLflow Projects

Package data science code in a format that enables reproducible runs on any platform.

## MLflow Models

Deploy machine learning models in diverse serving environments.

TensorFlow

PyTorch

dmk

XGBBoost

LightGBM

OPENAI
