

4 common problems with scaling ML

Why data science teams need MLOps?

- Mundane steps with lots of

Getting started

boilerplate

- Slow, redundant iterative

Iteration speed

- Long time-to-market

development

Collaboration

- Different skills and background

- Team growth

Productionization

- Need to reduce operating costs

- Handoff to production is

manual and bottlenecked

- Difficulty to reproduce and

control experiments

OpenSourceML&GenAI platform

mlflow

MLflow Recipes

Predefined templates to quickly develop high-quality models and deploy them to production

MLflow Tracking

Record and query experiments:
code, data, config,
and results.

MLflow Projects

Package data science code in a format that enables reproducible runs on any platform.

MLflow Models

Deploy machine learning models in diverse serving environments.

TensorFlow

PyTorch

dmk

XGBoost

LightGBM

OPENAI

Hugging Face
